Student Outcomes																		
1. Analyze a complex computing problem and apply principles of computing and other relevant disciplines to identify solutions						X			X		XA	XA						XA
2. Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline						X			XA		XA		XA		XA			XA
3. Communicate effectively in a variety of professional contexts	XA						X				XA							XA
4. Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles	X						XA											
5. Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline	X										XA				XA			
6. Apply security principles and practices to maintain operations in the presence of risks and threats.	X				X			X					X	XA	X	XA	XA	X

An "X" denotes courses in which students have the opportunity to learn the outcome.

An "A" denotes courses in which student performance is used for program level assessment of the outcome.
